

Manufacturer:

Company name: **4 COILS TECH s.r.o.**
Address: Vrazska 143, 153 00 Prague 5 – Radotin, Czech Republic
VAT no.: CZ13981391

Object of Declaration: Fin heat exchanger

Description of product: Exchangers for heating, ventilation, air conditioning and refrigeration equipments

4 COILS TECH s.r.o. declares that all products manufacture by them **do not contain any** of the listed substances from the **European Union Persistent Organic Pollutants (EU POPs)**.

This declaration provides confirmation that all products sold or otherwise placed on the market by **4 COILS TECH s.r.o.** have been evaluated against Regulation (EU) 2019/1021.

Persistent organic pollutants (POPs) are organic substances that persist in the environment, accumulate in living organisms and pose a risk to our health and the environment. They can be transported by air, water or migratory species across international borders, reaching regions where they have never been produced or used. International risk management is necessary as no region can manage the risks posed by these substances alone.

Chemical substances that have been identified as POPs include:

pesticides (such as DDT);
industrial chemicals (such as polychlorinated biphenyls, which were widely used in electrical equipment); or
unintentional by-products formed during industrial processes, degradation or combustion (such as dioxins and furans).
